SUMMARY

Machine Learning Engineer, Data Analyst and technology professional with over three years of experience analysing complex datasets, developing automated reporting solutions, and delivering data insights to support business decision making. Proficient in SQL, Python, Excel, and AWS, with experience building data pipelines, improving data quality, and collaborating with stakeholders to solve business problems. Strong analytical and communication skills with a passion for transforming data into actionable insights and driving continuous improvement.

EDUCATION

The University of Adelaide

Bachelor of Computer Science (Artificial Intelligence)

Eynesbury College

Diploma of Computing and Information Technology

Experience

Machine Learning Engineer

September 2024 – Present

AirLabOne

Support the development of data-driven automation solutions by analysing operational data, improving reporting processes, and collaborating with cross-functional teams to deliver reliable and scalable business solutions.

- Analysed operational and system data to identify trends and monitor performance.
- Built real time object detection, audio classification and event recognition systems enabling automated monitoring and analysis of laboratory operations.
- Applied reinforcement learning techniques within NVIDIA Omniverse and ROS/Gazebo simulations to explore autonomous machine behaviours.
- Performed data validation and quality assurance to ensure reliability and consistency of business information.
- Collaborated with software engineers, researchers, and business stakeholders to gather requirements and deliver analytical solutions.
- Produced technical documentation, process documentation, and project reports for internal stakeholders.
- Investigated system issues through structured analysis and contributed to continuous process improvement initiatives.
- Managed multiple projects simultaneously while consistently meeting deadlines in a fast paced environment.

Tools: Python, C++, SQL, AWS, Excel, Git, PostgreSQL, TensorFlow, PyTorch

Computer Vision & Machine Learning Engineer

November 2022 September 2024

Flux Robotics

Developed analytical solutions supporting autonomous systems through data analysis, validation, testing, and process optimisation while working closely with multidisciplinary engineering teams.

- Analysed large datasets to improve system performance.
- Designed repeatable testing and validation processes to improve data accuracy and system reliability.
- Collected, preprocessed, and validated image data to improve data quality and operational efficiency.
- Designed and trained computer vision models for object detection and classification in robotic environments.
- Improved robotic perception accuracy through model validation, performance analysis, and iterative optimisation.
- Worked closely with engineers and stakeholders to translate business requirements into analytical solutions.
- Contributed to continuous improvement initiatives by identifying opportunities to streamline processes and improve data quality.

Tools: Python, C++, SQL, OpenCV, Excel, AWS, ROS, Git, PostgreSQL

President

November 2022 – January 2024

Adelaide Myanmar Students Association

A university student association promoting Myanmar culture and fostering engagement within the university community.

- Led the executive committee in planning and delivering cultural, social and community engagement initiatives.
- Managed club resources responsibly, promoting transparency, accountability, and effective use of funds and assets.
- Collaborated with committee members and university stakeholders to improve member engagement and participation.
- Supported planning, decision-making, and continuous improvement of club operations through effective coordination and communication.

TECHNICAL SKILLS

Programming

Python, C++, Java, C#, JavaScript, TypeScript, SQL, Bash, MATLAB, R

Cloud & DevOps

AWS, Azure, Google Cloud Platform, Docker, Kubernetes, Git

Databases & Analysis

PostgreSQL, MongoDB, SQLite, SAS
